

END OF LIFE:

With an estimated 8,550,000 tons of furniture thrown into landfill each year, Catapult's commitment to reducing the impact of Catapult Design products on the environment means we offer an "End of Life" service on all furniture and lighting.

Should you ever decide to retire your Catapult product, please contact us and we will arrange to collect and re-use or re-cycle up to 100% of the components of your product.

This service will ensure your peace-of-mind when purchasing your product, knowing your environmental footprint is kept to a minimum.
